DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12-18, and 23 drawn to polynucleotides encoding chitinase, method of isolating polynucleotides and host cells, classified in class 435, subclass 252.3.
- II. Claims 19-20, drawn to a method of isolating wheat-derived chitinase, classified in class 435, subclass 7.4.
- III. Claims 21-22, drawn to polypeptides, classified in class 435, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, III and II are patentably distinct from each other. The method of group II neither uses nor makes the products of group I or III. The inventions have separate utilities and are subject to separate manufacture and sale. The groups have acquired separate status in the art and separate fields of search.

Inventions I and III are patentably distinct from each other. The polynucleotide of group I, the polypeptide of group III, each comprise nucleotide sequences and amino acid sequences which are chemically unrelated, do not require each other for practice; have separate utilities, such as use of the group I polynucleotide in a hybridization reaction versus the use of polypeptide to catalyze a chitin degradation reaction and are subject to separate manufacture and sale. The groups have acquired separate status in the art and separate fields of search.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Robert Carpenter on 11-4-01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1652

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
